

Welcome to Distinctive Dentistry!

We are a full-service family and cosmetic dental practice that utilizes innovative technology and current theory to bring you and your family the latest in dental care. We appreciate the confidence you have shown in us and look forward to meeting you. Please complete the enclosed registration forms and bring them with you on the day of your first appointment.

At your initial visit you can expect to be here approximately one and a half hours. We generally take a full mouth set of x-rays and complete a comprehensive exam that includes a cancer and periodontal health screening as well as determines what treatment has been completed and any future needs. We will also clean your teeth, although depending on your dental needs it may be necessary to complete your cleaning during a second visit.

Dental technology has come a long way. Possibly you've neglected your dental health for a bit too long, or maybe past experience has left you with apprehension when it comes to dental care. We will make every effort to keep you as comfortable and tension free as possible.

Preventive dentistry is our goal for every patient. It involves daily care, good nutrition and periodic check-ups and cleanings to maintain the good dental health already achieved. Preventive dentistry may not be where we start with every patient, but it's where we like to finish.

If you have any questions between now and your appointment, we will certainly do our best to answer them. Please do not hesitate to call.

Again, we look forward to meeting you soon.

Sincerely,

Dr. Noelle George and Staff
